

constructivecloud

Save your business time and money and collaborate with ease.

*Provide your staff with Anywhere, Anytime Access to your
Sage Construction Software*

What are cloud and hosting services?

It's pretty simple, really. Instead of buying and managing your own hardware, software and servers, you put **constructivecloud** to work for you. It allows you to cut costs, collaborate easily and simplify your business' IT needs.

Savings

Instead of spending tons of money on expensive hardware, software and servers, you can get access to all the business applications you need, and store your data on our servers — that's the cloud. It's simple and secure and helps you save. It also eliminates the hassle of purchasing software license fees and upgrade costs.

Simplicity

With our cloud technology, we make sure everything is kept up-to-date — this means we handle all the updates, upgrading, hardware and even daily operations. You don't even need to think about it. The result? A smoother work experience for you and your business.

Flexibility

Your business is always changing, and so are its needs. With **constructivecloud**, you can adjust the services you use and how you use them any time. Business may fluctuate, but our service is always there.

Redundancy

99.99% uptime guarantee with over 16 International Data Centers equipped with Dual Backup Generators, Dual-Feed Internet and Redundant Networks. With **constructivecloud**, you can rest assured you will have access to data.

constructivecloud

Your Sage Construction Applications... Anytime, Anywhere

Unleash the Power of the Cloud on your team and watch productivity accelerate.

Canadian

With redundant Canadian Datacenters to meet all of your needs you can rest assured that your data is safe from the Patriot Act and less exposed to Cyber-attacks!

All our services are invoiced in Canadian dollars so you don't have to worry about the ever fluctuating foreign exchange rates.

We are a premier hosting provider for Sage Construction Specific applications in Canada and can help take all your business applications to the cloud.

Industry Specialists

Created by construction industry specialists with over 20 years' experience working with Sage construction applications, **constructivecloud** is built to satisfy the critical standards and specific needs of both financial and project teams - with the latest cloud technology for seamless sharing, simple collaboration.

Sage 100 Contractor, Sage 300 CRE (Timberline), Sage Estimating, Timberscan, My Assistant, Office Connector, Sage Service Operations, Trimble Prolog...we can manage them all!
