

The New Mobile Experience for TimberScan

Easy to use

The sleek interface is simple to navigate!

Fully-integrated

TimberScan Go connects to TimberScan and Sage 300 CRE

No added costs

No cost per transaction, no bothersome monthly charges—TimberScan Go is part of TimberScan!

Trusted for over 15 years, TimberScan, by Core Associates, is the only AP processing system designed exclusively for Sage 300 CRE. TimberScan automates every aspect of the AP process to help eliminate manual tasks while reducing paper usage and now, it includes a fully integrated mobile app.

Introducing TimberScan Go. Connecting field personnel to the back-office has never been easier - or more cost effective. With TimberScan Go, approvers can review, modify, approve, reject, and route invoices from their Android, iOS mobile devices, or laptop. You can finally relax knowing your mobile app is designed and supported by the makers of TimberScan.

Best of all, the app is included with TimberScan and is available FREE for existing TimberScan users active on support!

Technical Requirements

Setting-up TimberScan Go:

Windows Server machine with IIS installed is required. Compatible versions include:

Operating System	Version	Architectures
Windows Server	2008 R2 SP1+	x64, x86

Core Associates will require remote access to the server to install an Octopus tentacle (ie. a deployment tool for delivering new and/or updated software builds.)

Running TimberScan Go:

Core Associates will provide you with a custom URL, such as clientname.timberscango.com. To access TimberScan Go, all you need to do is enter the custom URL using any of the following:

1. Windows Devices with Chrome v.70+, Firefox v61+, Edge v42+, or Safari v.9+. For all Windows devices, Chrome or FireFox are the recommended browsers.
2. Android v.4.1 devices (phones or tablets) via a Chrome browser.
3. iOS v12.0 devices (iPhones and iPads) via a Safari browser.
4. MacO with any version that supports Chrome v.70+.

Regardless of your operation system, it is not recommended to use Internet Explorer to access TimberScan Go.

TimberScan Go will also be accessible from an icon on your mobile device once the website is saved to your device's homepage.
